

Featured Part

April

Powder Coating Specialists

April's featured part of the month are some steel weldment scale bases. These weldments were in excess of 250 pounds and coated with Sherwin-Williams Powdura High Gloss Safety Yellow Powder. These weldments had a lot of deep cavities on the bottom side and were a challenge but we were successful with getting full coverage. If your company has a challenging part please give us the opportunity to quote your needs.

Quiz:

Studio executives wanted OJ Simpson to play the Terminator. James Cameron thought OJ was too nice to play a killer cyborg.

- a) True
- b) April Fools.

Fun Fact:

Greek philosopher Plato is responsible for discovering that you can mix two different paint colors together to produce a third color.

Quote:

"The painter will produce pictures of little merit if he takes the works of others as hi standard."

~ Leonardo da Vinci ~
