

**March**  
Featured Part

## Powder Coating Specialists

March's Featured Part is a split rim set that was powder coated gloss white from the manufacturer. This split rim set need to be powder coated a different color for our customers requirement and specifications. We removed the existing powder coating by burning it off in our very large burn off oven, cleaned the residue and ash to bare metal for the new powder coat finish. We powder coated these rims in RAL 3002 High Gloss Carmine Red Smooth. Our customer was very pleased that we were able to help them with this color change. If your company is looking for a responsive high quality powder coater please give us the opportunity to quote your needs.

### Fun Fact:

Spray paint was invented in 1949!  
By Edward H. Seymour, he added paint to existing spray can technology at his wife Bonnie's suggestion. It's usefulness in working illicitly at speed was exploited in the 1970s by Graffiti Artists.

### Problem:

A Galvanized substrate with an oxide layer has formed. What is this called?

- A. New Galvanizing
- B. Weathered Galvanizing
- C. Unsuitable galvanizing
- D. Previously painted Galvanizing

### Quote:

“Painting is just another way of keeping a diary”

~ Pablo Picasso ~
